

**DIGITAL PROJECTED IMAGES  
FREQUENTLY ASKED QUESTIONS**

**Q.** Do we need a special screen?

**A.** No. The standard matte white screen used for slide competition is good. The only restriction is you cannot use a beaded or lenticular screen.

**Q.** Do we need special judges?

**A.** No. The images are judged to the same pictorial standards as any other image.

**Q.** Do we have to use new images or ones taken with a digital camera?

**A.** No. Any image in digital format can be used. This means that images in other formats – i.e. slides, prints, etc – can be scanned and submitted as a digital file.

**Q.** With the image dimensions required – 1024 by 768 pixels – will a vertical image suffer in competition?

**A.** No more so than a cropped image in slide competition. Judges should not take image size into consideration.
